

# Review of: "Studying the Level of Livelihood Vulnerability and the Necessity of the Work Developing a Farmhouse Economic Economic Model to Adapt to Climate Change in the Coastal Area of Ben Tre"

Tri Doan-Quang

Potential competing interests: No potential competing interests to declare.

The manuscript's writing and structure, in terms of content, methods, and results, are not enough to ensure scientific quality. The manuscript title is quite interesting; however, when reading the content, the results inside are not as expected by the reader. The manuscript needs to be restructured and clarified regarding the novelty, methods, research data, the applied economic model, etc.

The form and content of the figures need to be translated into English (Figure 1), tables need to be numbered consecutively, and additional source citations (a total of 6 references) are too modest for a scientific article.

Conclusion: The manuscript does not have enough scientific content for submission for publication.
