Potential competing interests: No potential competing interests to declare.

1. "Online learning during the COVID-19 pandemic, lessons learned and what's next?" is the title of the proposed article.
2. Abstract is written in an informative manner.
3. Keywords must be started with capital letters and separated with semicolons.
4. Introduction section is presented nicely.
5. Author(s) need to mention objectives, motivation and challenges related to their research work in a separate section.
6. Novelty of work should be strongly emphasized by authors.
7. Author(s) are encouraged to draw a taxonomy of their literature survey for better understanding the 'state-of-the art' in the research domain and research gap(s).
8. Arrange the article strictly as per the journal's template.
9. Although the author(s) wrote the article in an impressive way, there is still a scope of validation of their results from annotators for applicability in the industries.
10. For the same, authors are encouraged to include some recent publications. Following recommendations are strongly advised to include:
 - (a). Nikhil Govil, and Ashish Sharma, "Estimation of Cost and Development Effort in Scrum-Based Software Projects Considering Dimensional Success Factors", *Advances in Engineering Software*, Vol. 172, 103209, 2022.
 - (b). Shubhra Goyal Jindal and Arvinder Kaur, "Information Retrieval from Software Bug Ontology Exploiting Formal Concept Analysis", *Computación y Sistemas*, Vol. 24, No. 2, pp. 413–428, 2020.
11. Overall, the article is written in an informative and impressive manner to a good extent.
12. Authors must incorporate all the suggestions mentioned above.
