Potential competing interests: No potential competing interests to declare.

The manuscript is accepted for publication without any changes and modifications.

The manuscript has been written very well in all the sections: introduction, methodology, results, and discussion.

In the methodology section, the chemical modifications have been presented nicely with docking scores.

In the results section, the heading

5.1. Docking Results and Interactions of Standard Donepezil

Nothing is written under this heading; then, text started under the next heading.

It is suggested to reconstruct this section.
