Potential competing interests: No potential competing interests to declare.

The article has a good general structure, its writing and grammar is clear and simple, it clearly establishes its objective and justification, the methodological section is synthetic but clear and complete in relation to the study carried out. It offers results from data obtained from primary sources and the conclusions and recommendations are appropriate with the results obtained and may be useful for the evaluated institution itself to take it as a reference to make improvements and replicate said study with other institutions.
