Bladder Papillary Urothelial Neoplasm of Low Malignant Potential

National Cancer Institute

Source

National Cancer Institute. *Bladder Papillary Urothelial Neoplasm of Low Malignant Potential*. NCI Thesaurus. Code C27884.

A papillary neoplasm of the urinary bladder in which the transitional cells form papillae. The papillary structures exhibit minimal architectural distortion and minimal atypia. Mitoses are infrequent. Patients are at an increased risk of developing new papillary lesions. Occasionally, the new lesions are urothelial carcinomas.
