Potential competing interests: This manuscript shows the effectiveness of Vonoprazan-based therapy versus Proton Pump Inhibitor (PPI)-based therapy for the eradication of *H. pylori* infection in treatment-naïve and treatment-experienced Egyptian patients.

This manuscript shows the effectiveness of Vonoprazan-based therapy versus Proton Pump Inhibitor (PPI)-based therapy for the eradication of *H. pylori* infection in treatment-naïve and treatment-experienced Egyptian patients. It presents enough data and implications to encourage more research or clinical practice for treating *H. pylori* infections.
