

Review of: "ABC Group's Business Continuity Based on Uncertainty Analysis"

Valentin Marian Antohi

Potential competing interests: No potential competing interests to declare.

The work carried out is of interest, the authors set out to develop a business model based on uncertainty analysis to ensure the continuity of the ABC Group's business. To improve the article I recommend the following:

- extension of the bibliography used;
- presentation of the proposed business model, the impact of its use, the expected results on the analysed indicators.
