

Review of: "Teaching Method Preference by College Teachers in India"

Pouria Aghaei

Potential competing interests: No potential competing interests to declare.

The research article is concise and informative. All the parts including introduction, methodology, discussion, and conclusion part are well-designed and informative except the charts and graphs which could be more precise.

Furthermore, in the discussion section, the authors should juxtapose their current findings with the previous results in the field. All in all, the article paves the way for further insights regarding the issue in the pedagogical contexts.
