

# Review of: "Neuro-Fuzzy-Based Adaptive Control for Autonomous Drone Flight"

Jian Lian

Potential competing interests: No potential competing interests to declare.

More recent studies in the literature need to be incorporated in the literature review section.

The authors should consider merging the Figures (5-9 and 12-14) to provide a more concise and clear presentation of the experimental results.

The definitions of the variables used in the equations should be provided with more detailed description.
