

Review of: "Visualization of Home Security Sensor System Based on IoT Server"

Luís Correia

Potential competing interests: No potential competing interests to declare.

1. Writing needs improvement. Some errors with regard to grammar.
2. The literature review is not developed. The authors should look at other similar works.
3. In chapter 2 the characteristics of the hardware and software chosen for the prototype are presented, this information should be in a subchapter of chapter 3.
4. The figures are not referenced in the text.
5. Some figures have low resolution, which makes reading difficult.
6. The tests performed are not clear and do not evidence the advantages of the proposed solution.
7. The authors should mention the limitations of the proposed solution.
8. In the conclusion chapter, the added value of this solution is not indicated. The authors should also indicate the improvements to be implemented in the future.
