Potential competing interests: No potential competing interests to declare.

The research has a relevant approach, however, it has some weaknesses and limitations:

1 - understanding Paulo Freire's theory

2 - translation from English;

3 - The introduction is very dedicated to the life of Paulo Freire, it should better delineate the research object;

4 - need to make it clear that the dialogue process is related to the production of results

Finally, it is suggested to better systematize the interview process and data organization. One suggestion is for the researcher to return to the field and use focus groups with generative themes (which Paulo Freire himself used). And from that propose thematic categories. The creation of thematic categories will allow a denser analysis and a closer dialogue with the works of Paulo Freire. Furthermore, it is necessary to consider that the school in its disciplines also operate with contents that are distant from the students and this is not a problem in itself, but it is necessary to create sociocultural approximations and expansions
