Although the methods and findings of your research are in accordance with scientific research methods, there are many aspects that need improvement. First of all, in the introduction section, you should include more detailed literature results regarding the relationship and effect of the variables included in the research. The importance of why you are doing this research should be stated more clearly. In hypotheses or research problems, one must be chosen. Many different expression types have caused repetition. The characteristics of the people in the sample group can be explained in more detail. Table bottoms can be expressed in more detail. Including your own comments in connection with the literature, instead of only including the research results in the literature, will strengthen the research.
