

# Review of: "Determinants of Women Entrepreneurs' Business Performance: Evidence from Micro and Small-Scale Enterprises in Arba Minch Town, Southern Ethiopia"

Alisson Maehler

Potential competing interests: No potential competing interests to declare.

Current and relevant article, well written and with a good literature review. Suggestions: highlight the research problem; Reduce the size of the summary; In chapter 2, see the space between the lines; Place the text in justified; Well-constructed hypotheses; Good literature review; The conceptual model is well developed and easy to understand; The methodology is well described and detailed; Limitations and future research could be within the conclusions chapter; I suggest closing the article with a paragraph and not a list of items.

I am in favor of approving the article
