The paper is intriguing and pertinent to the subject. Here are some suggestions I have for making the article better.

Abstract

Please remove figures (such as ($t = 5.836$, $p < 0.05$)) from the abstract. This should be well outlined in the detailed discussion of the document.

Methodology

Please show with the formula (Taro Yamane's formula) how the sample size was determined for the study.

Conclusion

Create a subsection called "Limitations and Future of the Study." Highlight what the limitations were for the study and the proposed recommendations for future study.

Thank you for reviewing the paper.
