# Peptidyl-Prolyl Cis-Trans Isomerase F, Mitochondrial

National Cancer Institute

## Source

National Cancer Institute. *Peptidyl-Prolyl Cis-Trans Isomerase F, Mitochondrial*. NCI Thesaurus. Code C118236.

Peptidyl-prolyl cis-trans isomerase F, mitochondrial (207 aa, ~22 kDa) is encoded by the human PPIF gene. This protein is involved in the regulation of both cell death and protein folding.
