Pituitary Gland Mixed Gangliocytoma-Adenoma

National Cancer Institute

Source

National Cancer Institute. *Pituitary Gland Mixed Gangliocytoma-Adenoma*. NCI Thesaurus. Code C155767.

A pituitary gland neoplasm composed of mature ganglionic cells admixed with pituitary adenoma cells. The adenomatous component is positive for growth hormone in the great majority of tumors, with other cases found to be positive for prolactin and ACTH. (WHO 2017)
