

# Review of: "The Role of Women's Business Performance in Promoting Sustainable Development"

Dr. Muhammad Rafiq<sup>1</sup>

<sup>1</sup> Superior University

**Potential competing interests:** No potential competing interests to declare.

overall, the theme of the study is good and comprehensively defined. however, the phenomenon of promoting sustainable development is ignored in research model. research model need to be revised and fertilized. the research design also need to be specific. the research approaches are inductive, deductive and abductive which is misinterpreted. theoretical perspective also need to be clear.

I hope my suggestions will help to improve.
