# PKA Regulatory Subunit RIalpha Mixed-Backbone Antisense Oligonucleotide GEM 231

National Cancer Institute

## Source

National Cancer Institute. *PKA Regulatory Subunit RIalpha Mixed-Backbone Antisense Oligonucleotide GEM 231*. NCI Thesaurus. Code C1810.

A mixed backbone oligonucleotide exhibiting antitumor activity. GEM-231 is complementary to the RI alpha subunit of Protein Kinase A (PKA), resulting in downregulation of PKA expression and ultimately tumor growth. (NCI)
