Nursing Assistant

National Cancer Institute

Source

National Cancer Institute. *Nursing Assistant*. NCI Thesaurus. Code C53431.

Nursing auxiliary whose primary responsibility is personal patient care and education, support of diagnostic procedures, technical nursing work, and patient charting which does not require a full professional nurse education or knowledge and skills represented by licensure. The performance of these tasks involves direct work relationships with patients and participation as a member of the treatment or nursing care team in direct service to patients.
