Supraglottic Cancer Clinical TNM Finding v7

National Cancer Institute

Source

National Cancer Institute. *Supraglottic Cancer Clinical TNM Finding v7*. NCI Thesaurus. Code C89060.

A clinical finding about one or more characteristics of supraglottic cancer, following the rules of the TNM AJCC v7 classification system. The assessment is accomplished primarily by inspection, using indirect mirror and direct endoscopic examination with a fiberoptic nasolaryngoscope. The tumor must be confirmed histologically, and any other data obtained by biopsies may be included. (from AJCC 7th Ed.)
