Epithelial recurrent erosion dystrophy

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base. Epithelial recurrent erosion dystrophy. ORPHA:293381*

Epithelial recurrent erosion dystrophy (ERED) is a rare form of superficial corneal dystrophy (see this term) characterized by recurrent episodes of epithelial erosions from childhood in the absence of associated diseases, with occasional impairment of vision.
