

Review of: "Targeting Alzheimer's disease hallmarks with the Nrf2 activator Isoeugenol"

Ratchaniporn Kongsui

Potential competing interests: No potential competing interests to declare.

This manuscript is applicable, and the methodology is adequate. However, that only needs to undergo a few minor changes as below.

1. The authors should improve the quality of some images.
2. In fig. 11, please add scale bar in each image.
3. In the method, should add reference for behavioral tests
