Dear Authors,

Thank you so much for your organized and detailed study, which I believe addresses a very interesting topic. However, some relevant points need to be addressed:

- Replace “prion to” under subheading “3.3 Instruments,” line 2, on page 9/27 with “prior to.”
- Recheck the structure of the following sentence: “This cooperative dynamic is probable to amplify the childrens' enjoyment derived from the educational activity,” under subheading “5.2. Comments on the factors examined in the questionnaires and their influence on the learning outcomes,” line 4 from the bottom of page 18/27.
