Dear Author and Editor,

1.The introduction part should contain the following points.

1. Introduction about the various skin diseases.
2. How much people affecting the skin diseases per year all over the world.
3. Then focus on the specific skin diseases.
4. How the nanoparticles are involved for curing the skin diseases.
5. What are the nonoparticles used for curing the skin diseases.
6. Focusing on the copper nanoparticles for skin diseases.
7. Advantages of copper nanoparticles for skin diseases.
8. Overview of the over all review paper that should be given at the last.

2. The methodology, properties and applications can be explained in the tabular form in detail manner. Then only it will be very much useful for the researchers those who are doing the further research in the particular area.

In 2 heading the following point should be modified.

- 2.1 Explain few research articles how they have synthesized the copper nanoparticles. That is very important before going to explain about the copper nanoparticles.
- 2.2 Mention the various remarkable properties from the existing research articles then only it give informative information to the readers.
- 2.3 Explain the mechanism of action of copper nanoparticle How the nanoparticles interact with microbes which is present in the infected area.
- 2.4 Applications of nanoparticles should be explained elaborately from the various research works.

In 3 heading the following point should be modified.

here the methodology, properties and applications can be explained in the tabular form in detail manner. Then only it will be very much useful for the researchers those who are doing the further research in the particular area.

In 4th heading the following point should be changed.

Findings and analysis of copper nanoparticles should be given in the tabular form.

In 5th heading the following point should be changed.

various adverse effects should be listed in the tables for the easy understanding of the readers.

In 5.3, Risk effects to be given in the tabular form with references.

In 6.2 This part should be given in the introduction part.

Advantage and disadvantages of the copper nanoparticles should be given in the introduction part.

The above mentioned corrections should be made by the author. kindly revise the manuscript properly. Then only it may be accepted for the publication.
