As a reviewer, I would like to commend the authors for their insightful work on "Towards Responsible AI-Assisted Scholarship: Comparative Assessment of Generative Models and Adoption Recommendations." This paper offers a comprehensive examination of the impact of generative models in the realm of scholarship and academia.

The authors have conducted a meticulous comparative assessment, shedding light on the strengths and limitations of various generative models. Their systematic approach in evaluating these models provides valuable insights for researchers and practitioners looking to harness AI for scholarly purposes.

Furthermore, the adoption recommendations put forth in this paper are of significant importance. In an era where AI is becoming increasingly prevalent in research and academia, responsible usage is paramount. The suggestions presented here offer a practical guide for ensuring ethical and responsible AI-assisted scholarship.

Overall, this paper represents a commendable effort in addressing the intersection of AI and academia, and it is a valuable contribution to the ongoing discourse on responsible AI usage in scholarly endeavors.

Paper is suitable for publication. After the detailed review of work, I found that paper is appropriate for targeted audience.
