Potential competing interests: No potential competing interests to declare.

First of all, the review is written in a thorough and clear manner. It is also very useful as it discusses such a traditional plant in such a detailed way mentioning its identified uses and pharmacological activities.

Secondly, kindly find below my suggestions:

1. I suggest to add a line or 2 about the cultivation conditions for this plant.
2. The photos of the phytoconstituents (Table 1) need to be of higher quality.
3. I also suggest to prepare a supplementary data file containing a list of the identified compounds in each of the plant parts alongside the collective identified classes in Table 2.

Thank you and best of luck.
