Thank you for your work. It seems to be in decent condition. On the other hand, the paper does not include an explanation of the approach that was taken to pick possible replies, which is a poor practice for a scientific paper. According to the report, the impact of the COVID-19 epidemic on monetary and economic policies that led to an increase in public debt, monetary overhang, and inflation is not taken into consideration. In the near future, we would be looking forward to an improved version. Thank you.
