

# Review of: "In-Vitro Antibacterial Activity of some Ganoderma Species: A Review"

Edson José Mazarotto

**Potential competing interests:** No potential competing interests to declare.

The review addresses an important and interesting topic, with potential for publication. However, the manuscript contains spelling errors and needs to be better organized and more in-depth. The majority of compounds of the mentioned species, endemism, and other infections treated can be entered. If the focus is only on the diabetic foot, the title needs to be revised.
