# Diffuse Large B-Cell Lymphoma Unclassifiable

National Cancer Institute

## Source

National Cancer Institute. *Diffuse Large B-Cell Lymphoma Unclassifiable*. NCI Thesaurus. Code C45231.

A biologic subset of diffuse large B-cell lymphomas (DLBCL) that do not overexpress the genes whose overexpression characterizes the germinal center B-cell-like and activated B-cell-like DLBCL. Morphologically, these lymphomas are either immunoblastic or centroblastic. Patients with this type of diffuse large B-cell lymphoma are reported to have a less favorable outcome, similar to those with an activated B-cell-like gene expression profile.
