Potential competing interests: No potential competing interests to declare.

The abstract is perfect, especially the aim and objective are specified along with the methodology.

In the introduction head, few statements need citations.

The methodology section is explained in interesting way.

Please explain the 2-norm residual and clarify why this value is too high in the second wave.

Please add discussion section.

The pro's and con's of this model compared to well defined SIR models can be added.
