**Potential competing interests:** No potential competing interests to declare.

The authors attempt on Buruli ulcer is highly appreciated. Hence, they can collect more number of samples. The authors should give justification on the following calculation: "The period prevalence =  $56/73,263 \times 10,000$ ". Authors should re-write the Strength and Limitations. Conclusion needs clarity. Photos of Buruli ulcer may be provided to sensitize the readers about the diseases.
