

Review of: "Could governmental interventions improve subjective well-being during the COVID-19 pandemic? Findings from 750 street vendors in Cali, Colombia"

Khadija Shams

Potential competing interests: No potential competing interests to declare.

The topic is interesting, but it is not cleared which econometric model has been applied. The variables related to the moderation effect of a certain variable are also not explicitly defined in the model.

The author has used reverse coding but the justification is not clear and logical.

There need to be adjustments in the methodology part.
