Potential competing interests: No potential competing interests to declare.

The paper is written on an actual topic. The content of the paper corresponds to its title. The summary is written well, contains all the most important results, corresponds to the text of the article. Established tasks are reasonable, convincing, well-formed. The material of the paper is set out logically. Discussions and conclusions are significant, consistent with the results. The list of references is sufficient.

But I have the remark. I would like to see your point of view on this issue as a conclusion from the reviewed material.
