**Potential competing interests:** No potential competing interests to declare.

The manuscript is mostly intriguing. However, several flaws appear throughout the work.

- There is a need to improve the abstract section; the abstract should be focused on the study topic.
- Some paragraphs of the research require a citation. Especially, the introduction part should be revised.
- The researcher evaluated several outcomes without addressing them (certain results require scientific explanation).
- The summaries are excessive; there is no need for such specifics.
