Dear authors

The followings could be added and improved:

1- In what way and which software the authors checked for N=5 to 9.

2- What are its uses clearly?

3- This paper needs to give more information about its purpose to the reader.

4- I recommend that the authors see the following paper :

R. George, Z. D. Mitrovic, On weak quasi-contractions and weak contractive maps in  $bv(s)$  and strong  $bv(s)$ -metric spaces, (Preprint).
