X-Linked Agammaglobulinemia

National Cancer Institute

Source

National Cancer Institute. *X-Linked Agammaglobulinemia*. NCI Thesaurus. Code C3822.

X-linked agammaglobulinemia. An immunodeficiency state characterized (usually) by profoundly low concentrations of serum immunoglobulins of all classes, although occasionally significant amounts of one or more isotypes can be found. The fundamental defect in XLA affects early lineage B cells.
