Potential competing interests: No potential competing interests to declare.

1. The abstract of the article is comprehensive, but it is preferable to write a summary of the whole research methodology, starting from the literature review of previous studies and ending with the finding including brief & aim .
2. An alternative title:
Sustainable Indicators Framework for Safe City Concept in Smart City Planning
3. The Purpose of Study is unclear, A fruitful approach to smart cities is described through the indicators that measure the effectiveness. To enhance the urban life quality and competitiveness in India, an effective strategic approach must be developed that achieves smart city criteria and indicators. In this context, the research is concerned with reviewing the previous literature for sustainable smart city standards and indicators by international cases. For achieving a proposed structure of indicators that is easy to implement and includes the essential aspects of smart cities to serve as a priority setting support to propose a strategic approach to smart city planning in India.
4. It is preferable to including more pictures and figures in the international examples
5. References needs to be reviewed (reference will include the publisher, name of the journal, volume and issue, date, page numbers and DOI). Also, references must be mentioned in the text.
