Dear review team

I read this review article entitled "The Quantum Origins of Gravity". This is a valuable work, but it needs a minor revision.

1- The parameter s_1 in Eq. 3 has been introduced.

2- The references of some equations have been missed, for example, Eqs. 6, 14, and 15.

3- Some parts of the text are not referenced, for example, the paragraph above Eq. 3 or the paragraph explaining Eq. 6.

Best regards,

Somaye Zare
