Log10 50 Percent Tissue Culture Infective Dose per Microliter

National Cancer Institute

Source

National Cancer Institute. *Log10 50 Percent Tissue Culture Infective Dose per Microliter*.
NCI Thesaurus. Code C132479.

A logarithmic-scale (base 10) potency unit for measuring infectious activity of a biologic product or infectious agent preparation equal to the potency at which one microliter of infectious material contains one 50 percent tissue culture infective dose.
