Abstract should show clearly the findings and recommendations for each

Introduction

Quantify the % contribution in the statement "Women play a crucial role in the agricultural sector in Uganda, accounting for the majority of the workforce involved in agribusiness activities."

This statement "However, despite their significant contribution, women face numerous barriers when it comes to accessing financial services for agribusiness" should be followed by specification of the barriers with citation

Research methodology not clear: Read the following and redo your section [Literature review as a research methodology: An overview and guidelines - ScienceDirect](#); [Methodological Approaches to Literature Review | SpringerLink](#)

More review needed, the review is still shallow. If you could include some metrics in the literature (start global, go continental, then regional, and finally zero in on the study country)

More visuals can be included in the review, i.e., graphs, tables with metrics, maps, etc.
