

Review of: "Why Non-HDL Cholesterol is Preferred over Apolipoprotein B-100 (Apo B)"

Majid M. Mahmood

Potential competing interests: No potential competing interests to declare.

The research is scientifically sound and bears an undisguised societal health importance. I have been embodying ideal ways to achieve his goal. The researcher presented useful results and reinforced them with a thorough discussion. He adopted adequate and relevant references for the subject of the research. The manuscript was written in a sound language and met the writing requirements of standard scientific publications. Therefore, the research deserves attention and publication.
