# Tobacco plant

Addiction Ontology

## Source

Addiction Ontology

**Definition:** A plant of the species that belongs to the Nicotiana genus of herbaceous plants.

**Comment:** Nicotiana species include many varieties. These are commonly referred to as tobacco plants, and are cultivated as ornamental garden plants. N. tabacum is grown worldwide for production tobacco-containing products.

**Curator note:** Although there are definitions of tobacco plant in other ontologies, these were not quite suitable for the purposes of AddictO.

*This definition was imported from the Addiction Ontology (see <https://addictovocab.org/>). Comments and suggestions for improvements are welcome using the Qeios review system.*

*Definitions imported from the Addiction Ontology (AddictO) are what are known as 'ontological definitions'. See this article in Qeios for an explanation <https://www.qeios.com/read/YGIF9B>.*

*Ontological definitions can sometimes be hard to read. In those cases we also include an informal definition.*

*Definitions also often require elaboration to make it clear how they should be used and what they include. In those cases we include a comment.*

*Also, definitions sometimes require an explanation as to how they came about to help users understand how they relate to alternative definitions. In those cases we include a curator note.*
