Dear Authors,

Thank you so much for your well-written paper and detailed data analysis, which I believe addresses a very interesting topic. I would recommend a better description of transcribing and analyzing the interviews to develop themes and a more structured abstract. More than half of the references suggested as research sources are old. A good rule of thumb for acceptance is that medical, scientific, and technology resources should be published within the last 5 years to prevent the information from being out-of-date.
