Potential competing interests: No potential competing interests to declare.

The authors of the paper have specifically addressed the physicochemical parameters, comparing them according to the degree of their special importance. Also, they are referenced according to international standards for the tested parameters, using contemporary methods and authentic description of the obtained results. The authors have taken into account the entire chronology of the project and have drawn clear conclusions related to their research; they have also cited adequate and contemporary literature.

Sincerely,

Assoc. Prof. Dr. Skender Demaku
