This article was useful in data information and showed the importance of KPI for a new founded hospital. I am certain they will have a well-designed data after a year for the advanced researches.

But in the case of writing I think some points are useful:

1- Please start your second sentence of abstract by capital W.

2- We do not know anything about AMUs and LOS in abstract. It is useful if you define LOS at the first place you used it (one sentence before).

I hope data gathering going well in your hospital.

That was a precious descriptive study.
