Potential competing interests: No potential competing interests to declare.

Introduction

The fifth paragraph, "Southwest Nigeria..." should be moved to the Study Site under the "Method" section. The description of the region should be moved there, while the statistics can stay in the "Introduction" section.

Methods

The Study Site should be included. The authors only mentioned "Southwest Nigeria," but weren't specific about which region in the Southwest the samples were collected from. Were they collected from all the states in the region?

The authors mentioned the inclusion criteria; what about the exclusion criteria?

Under the Typhoid Fever subsection, the authors mentioned "clinical laboratory." Where is this located?
