

Review of: "Design of an intelligent controller for improving the solar system efficiency"

Stanislas Amala Shanthi

Potential competing interests: No potential competing interests to declare.

In Introduction, the author must include a brief introduction about PV array , contribution of your work and organization of the paper at the the end of introduction.

Discuss about the proposed work with block diagram

Innovation in your work must be stated precisely.

Include relevant mathematical equation whenever necessary.

Inference from each and every graph should be clearly stated in terms of achieving improved efficiency.

conclusion should brief your entire work. Future work should also be stated.

If the abovementioned changes are done, this paper may be accepted.
