Dear Editor

Kindly find attached the MS of the article "Analysis of Vaginal Candidiasis Prevalence Among Bangladeshi Women in Relation to Menstrual Hygiene and Other Risk Factors: A Cross-Sectional Study," and my suggestions marked in the text.

In my opinion, the MS is so long; a lot of information can be omitted, especially in the introduction section. It is far from scientific, and I believe that it should be restructured with appropriate objectives and methodologies. References need to be updated.

The MS is not approved for publication.
