Potential competing interests: No potential competing interests to declare.

This literature review provides a solid overview of research on the impact of TikTok on students. Providing the motivation for conducting this review, the methodology adopted, appropriate citations, and a comparison of findings from different studies could give helpful context. While the review covers a breadth of impacts, discussing gaps in the existing research and areas needing further exploration would add value. The conclusion does a decent job summarizing, but could be expanded with limitations, implications, and future directions for research.
