

# Review of: "The Evolution of Adult Learners' Roles: A Case Study of an English Teacher's Transformative Journey"

Ben Chester Cheong

Potential competing interests: No potential competing interests to declare.

There is much room for improvement to make this piece publishable. The references (e.g. on nucleic acids, biomaterial design, peptide-based liquid droplets, etc.) do not seem to relate to the topic at hand, which is focusing on adult education and pedagogy. Please also follow academic citations, whether it be APA or others. Right now, there is considerable room for improvement to make this an academic article.
